

# Daily Spiral Review Day 10

## 1. OA.1

In a box of 51 books, each book weighs 3 or 4 ounces. Which is the BEST estimate of the total weight, in ounces of all the books?

- A. 50
- B. 65
- C. 200
- D. 250

## 2. MD.3

Molly has enough paint to cover an area of 250 square feet. She wants to paint two walls. The rectangular wall is 8 feet high and 30 feet wide. The square wall has a height of 9 feet. Does Molly have enough paint to cover the area of both walls? **Show your work and explain your thinking.**

## 3. OA.3

There are 327 fourth grade students and 21 teachers participating in Field Day. Drinks and food are needed for the event. The school will be providing the drinks.

- The school already has 285 drinks.

How many more will the school need to buy in order for each student and teacher to have 2 drinks?

## 4. OA.4

Missy said that 21 is a multiple of 3. Is Missy correct? Why or Why Not?

**OA.4** Which number below has factors including 6 and 9?

- A. 3
- B. 12
- C. 54
- D. 73

## 5. OA.1

Lisa bought a bag of apples that weighs 64 ounces. There are 8 apples in the bag. Which number sentence can Lisa use to find out how many ounces each apple weighs?

- A.  $64 \div 8 = \square$       C.  $64 \times 8 = \square$
- B.  $\square \times 8 = 64$       D.  $64 \times \square = 8$

**6. MD.4** The students measured the lengths of some insects in inches. The results are shown in the line plot.

What is the difference between the longest and shortest insects?
